## Business on the Pacific Coast.

This was years ago. Many are now imitating our example. We were the first to publish a PRICE LIST, and distribute the same free. It was the RED HOUSE that opened a way for the most distant party to supply his wants at the SAME PRICE as if standing at our counter (the small charge of Mail or Express added). In the many years we have been engaged in the strictly ONE PRICE business, and every article marked in Plain Figures, we have never broken faith with our customers, or varied even a penny to make a sale, and this is the secret of our success. From a very modest beginning, by strict business principles and equal justice to all, we have GROWN to be a Colossal Institution, doing business in rearly every town on the Pacific Coast through our finely organized

THE CONCLAVE AND ITS MANAGE-MENT. It is evident now from the published proceedings of the management that the Knights Templars of California, and especfally of San Francisco, have made very complete preparations for the entertainment of the visitors expected within the next few weeks. Certainly on the part of the committees and the organizations they represent, the arrangements appear to be unexceptionable. The attention to minor details is the best warrant for success in all such affairs. If all the little things are attended to, it is a guarantee that matters of greater moment have not been neglected. This is true of all entertainments, public festivals and demonstrations, the management of great concerns, and the conduct of a complex business. It is undeniable that success attends the men or committees in such affairs as the Conclave, who make it a point to perfect the lesser details of hospitality. A small omission, the neglect of a minor matter, the ignoring of what may be supposed to be an unimportant feature, will, oftener than otherwise, mar the effect of the whole entertainment, and entail far more discomfort upon the guest, than the failure to perfect the more prominent features arranged for his entertainment. It is in the evident attention given by committees and sub committees and sections of sub-committees to these matters, that insures the success of their part of the reception and the entertainments about to take place, and in which all the people of the State are more or less interested. It will be the first time in the history of the State that any considerable body of men has been induced to visit this coast in the capacity of an organization representative of good swimming across the Niagara gorge could citizenship and of nearly all the sections of not have benefited mankind, but his failure the Union. I know whereof I speak, for I have passed through this very experience myself, have long held they were, and believe the Courts will, when a test case is made, so hold, as, indeed, some have. Use less and nerve-torturing noises are less and nerve-torturing noises are less and nerve-torturing noises are less than the Catholic clergy in the United States will follow the instructions of the Pope in regard to Parnell and above described, they caused me annoyance, ten years ago I was the picture of health above described, they caused me annoyance, not only by reason of their aggravating na-

factory whistles, the blare of peddlers' horns in the midst of cities, and the ringing of church bells of cities, and the ringing of consulate two attempts were made consulated by the consulated spins of cities, and the ringing of consulated consulated spins of cities, and the ringing of consulated consulated spins of cities, and the ringing of consulated spins of cities, and the ringing of consulated consulated spins of cities, and the ringing of consulated consulated spins of cities, and the ringing of consulated consulated spins of cities, and the ringing of consulated consulated consulated spins of cities. It never occurred to me that analysis consulated consulated consulated spins of cities, and the ringing of consulated consula church bells at unseemly hours in crowded by the mob to force an entrance into the office tion of the body. But I continued to grow at night, but were frustrated by bolts and worse. I had a faint sensation at the pit of my stomach nearly every day. I felt a great desire to eat, and yet I loathed food. I was constantly tired, and still I could not sleep.
My brain was unusually active, but I could not think connectedly. My existence was a living misery. I continued in this condition

far worse than death, for which I confess I earnestly longed. It was while suffering thus that a friend

advised me to make a final attempt to re cover my health. I sneered inwardly at his suggestion, but I was too weak to make any resistance. He furnished me with a remedy. simple yet palatable, and within two days I observed a slight change for the better. This ered by Dr. Horace R. Hamilton before the swakened my courage. T.felt that I would not die at that time. I continued the use of the better. the remedy, taking it in accordance with di-rections, until I became not only restored to portant that it can be read with interest and my former health and strength, but of greater vigor than I have before known. This condition has continued up to the present time, and I believe I should have died as miserably There is probably no subject of modern times that has caused and is causing greater attention than the origin of tornadoes. Scidying every day had it not been for the sim-ple yet wonderful power of Warner's Safe

Cure, the remedy I employed. The lecturer then described his means of restoration more in detail, and concluded as

follows : My complete recovery has caused me to inrestigate the subject more carefully, and I believe I have discovered the key to most illwerful. health of our modern civilization. I am fully First, confident that four fifths of the diseases which fflict humanity might be avoided were the kidneys and liver kept in perfect condition, nosphere of our earth. An unusual generation of heat in one part of the atmosphere is ertain to cause a partial vacuum personnel to cause a partial vacuum personnel to control the action of the sun, cyclones could undoubtedly be averted. That, however, is one of the things that cannot be. But I rejoice to saw that certain to cause a partial vacuum. Hence the disturbances—hence the cyclone. This theory finds additional confirmation in the than poisoners. That this end has been ac-complished largely by means of the remedy I have named I do not doubt, and I feel it my duty to make this open declaration for the enlightenment of the profession and for the benefit of suffering humanity in all parts of the world.

Resolved further, That we recommend the use of the Cottier plan for ventilating water-closets, our reason for so recommending it being that, besides by its operation in conducting all gases through flues in the walls and at the top of the roof, so that they cannot escape otherwise, the active evaporation maintained by it from such cesspools and vaults as lessens their contents as to supersede in a vaults so lessens their contents as to supersede in a 1952, San France great measure the necessity for the remova! of such ntents by the employment of an excavator or

otherwise.

Resolved, That the Health Officer be hereby in resolved, that the attention of the public to these resolutions whenever he may ascertain that their warnings are applicable, and to abate promptly all nuisances that may come under his observation, or be justly complained of by any aggrieved person.

Resolved furthermore, That we respectfully recommend to the Board of Trustees that they have the sewers of the city ventilated, as by so doing the the severs of the city ventilated, as by so doing the quantity and pressure of the noxious gases, always present in such drains, would be very much lessened, and their liability to enter houses and created disease be thereby much diminished. jy27-lt\*

Yesterday morning parties in this city received a telegraphic message from a prominent merchant at Red Bluff, saying "Wife and I will be in Sacramento to-day, en route to San Francisco. Meet us at the depot."

The parties receiving the dispatch prepared an elegant dianer and went to the depot in a hack to meet their friends. They were not there, and some one at the depot informed them the parties they were looking for had gone down the road the day before. On examining the message it was discovered that it was dated the 25th instead of the 26th.

They returned to their home very much disgusted.

Has been more destructive to buman health and life than war, pestilence and famine combined." So said a distinguished writer many years ago, and it is as true to-day as then. The poor victim of Blood Disease is drugged with Mercury to cure the malady, and then dosed with lodides to cure him of the Mercurial Poisoning; but instead of any relief, the first breaks down his general health and makes him a cripple, and the

health and makes him a cripple, and the other ruins his digestive organs. To those afflicted in this way Switt's Specific is the greatest boon on earth, and is worth more than its weight in gold. It antidotes this Mercurial Poison, tones up the system, and brings the sufferer back to health and happiness. Every person who has ever been salivated should by all means take a thorough course of this remedy. JEFFERSONVILLE (Twiggs Co.), Ga.

The Striking 'Longshoremen - Seriou Trouble Feared. SAN FRANCISCO, July 26th .- On the arrival of the fruit steamers Reform and On-ward this morning the 'longshoremen engaged to unload them struck for 50 ceats per hour, This was refused, and the strikers were turned outside the wharf gate by the police amid some loud talk, but no violence. The terms of the strikers were agreed to after a mporary session-made with the understanding that the rate to-morrow would be 40 cents. Some were not allowed to return to work. An extra crew of twenty went up to-day on the Onward to help unload to-mor row. Trouble is feared on the return of the boats to-morrow, and a large force of police are engaged to preserve order. The transporters claim that they can get men for 35

Conflagration at Colusa. Colusa, July 26th.—A disastrous fire occurred here to-day, soon reducing about half the town in ashes. The loss is estimated at \$50,000; insurance, \$35,000.

(SECOND DISPATCH.) Colusa, July 26th.—The Sun extra has the following account of the fire: At half-past 12 this morning a fire broke out in the hayloft of the Dexter stable, and spread rapidly through the entire building. Some twenty horses are supposed to have perished in the flames, sixteen belonging in the stable, but the remainder being there for the night. Very little of the rolling-stock was saved. A strong south wind was blowing at the time but notwithstanding that the fire spread with marvelous celerity to the southward, not stopping until it had destroyed the Germania beer hall, Boysen's photograph gallery and gardens, and badly and completely gutted Klew's meat market. Klew's meat market. Toward the north the flames crossed Market street and caught Spauling's biacksmith shop, Passford's wagon-shop, and the paint-shop overhead. The fire then took a Chinese washhouse, adjoining the restaurant of Charry & Lemine on the east, and turning toward the north took the millinery shop of Misses Wiscotchill & Tay, and the dressmaking shop of Mrs. Glunore. Then followed in quick succession W. Cook's fruit store; Guernsey & Munson's meat market.

Here the flames stopped, the walls of the corner falling inward, thus saving the Colust House. On the west side of Fifth street the heat was so intense that plate glass windows were broken and the awnings in front caught fire.
The porch in front of Brooks' corner took the ord fire in several places, but the flames were extinguished before much damage was done. LINCOLN, July 26th .- The large new bunkers and hoisting works of the Clipper coalmine, at this place, were discovered to be on fire at about 5 o'clock this morning. The men work ing in the mine were instantly notified to come out, and all easily made their escape. By this time the fire had got under such head-way that the whole new works were doomed to destruction. There were four loaded cars atanding alongside the bunkers. The section men got to the works in time to save three of them, but, owing to the falling timbers, one could not be got out, and was burned. The loss will be heavy to the owners, who had just got the mine in shape to make it pay.

Mr. Landis, the principal owner and manager, has the sympathy of the entire communication. nity. All openings to the mine are being closed up. It is not yet known how far down the main shaft the fire has gone, but it is thought and hoped that the mine may be saved. Insurance, \$5,000, in the Firemen's Fund Insurance Company.

fails to cure.

There are many at the age of thirty to stxty who are troubled with too frequent evacuation of the biadder, often accompanied by a slight smarting or numing sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin mikish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a nealthy restoration of the genito-urinary organs.
